

- 1.) Lift trunk liner and locate DSC controller.

- 2.) Press the button on the connector to release locking mechanism.

3.) Release locking mechanism**4.) Once unlocked, remove controller from connector.**

5.) Remove controller from bracket**6.) LIBERALLY APPLY WD-40 TO PINS AND OUTSIDE OF DSC CONNECTOR****7.) Line up DSC sport connector with factory connector harness**

- 8.) Carefully slide DSC Sport controller into factory connector harness until seated. Do not push or force the connection; allow the locking mechanism to fully seat the connector into the harness.

- 9.) Secure DSC Sport controller in bracket.

NOTE:

The DSC Sport V2 controller is not a perfect fit for the OEM bracket. You can secure the controller using double sided tape, by modifying the OEM bracket as needed, or using the amplifier on applicable vehicles to secure the controller in place.

- 10.) Replace the trunk liner and get out and drive!
